## ADD VIDEOGAME TO DATABASE

ADD

<!--This is the background image-->

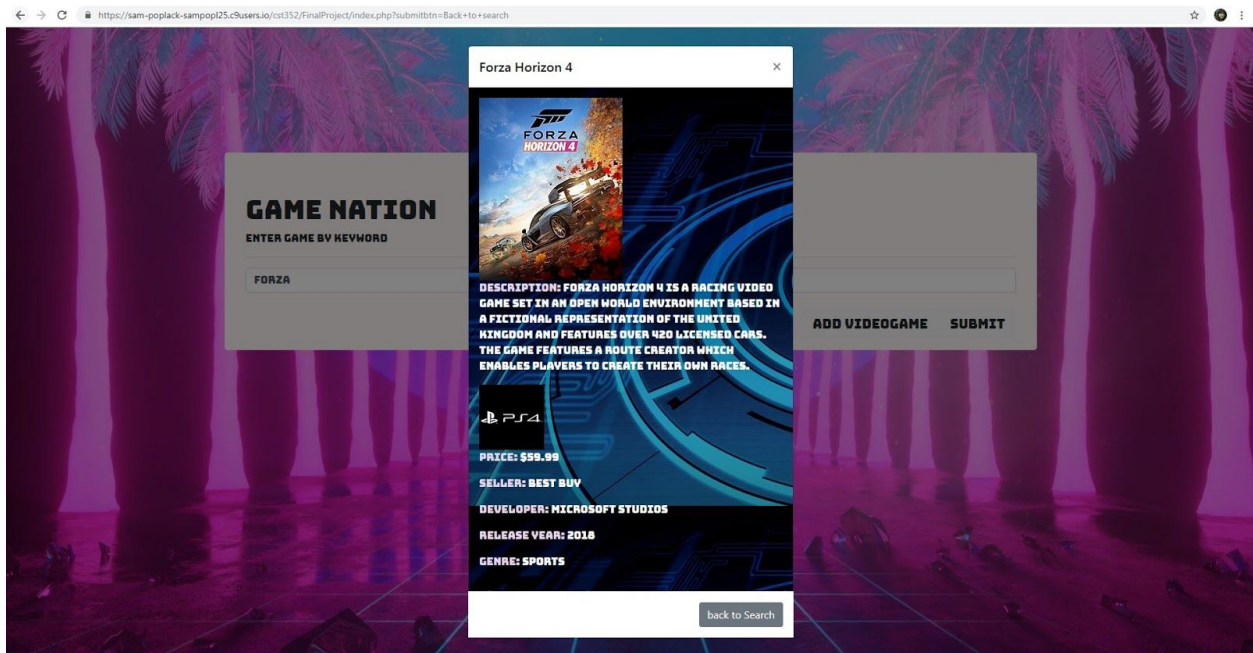

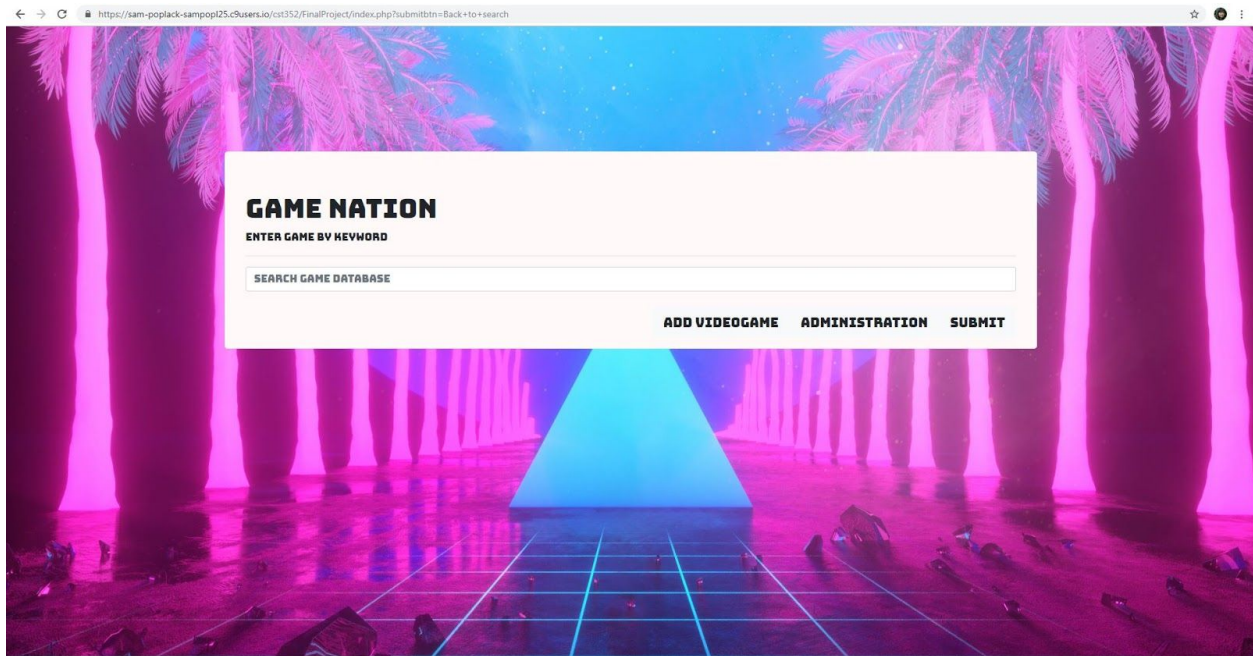

## DELETE VIDEOGAME FROM DATABASE

Enter keyword of video game record

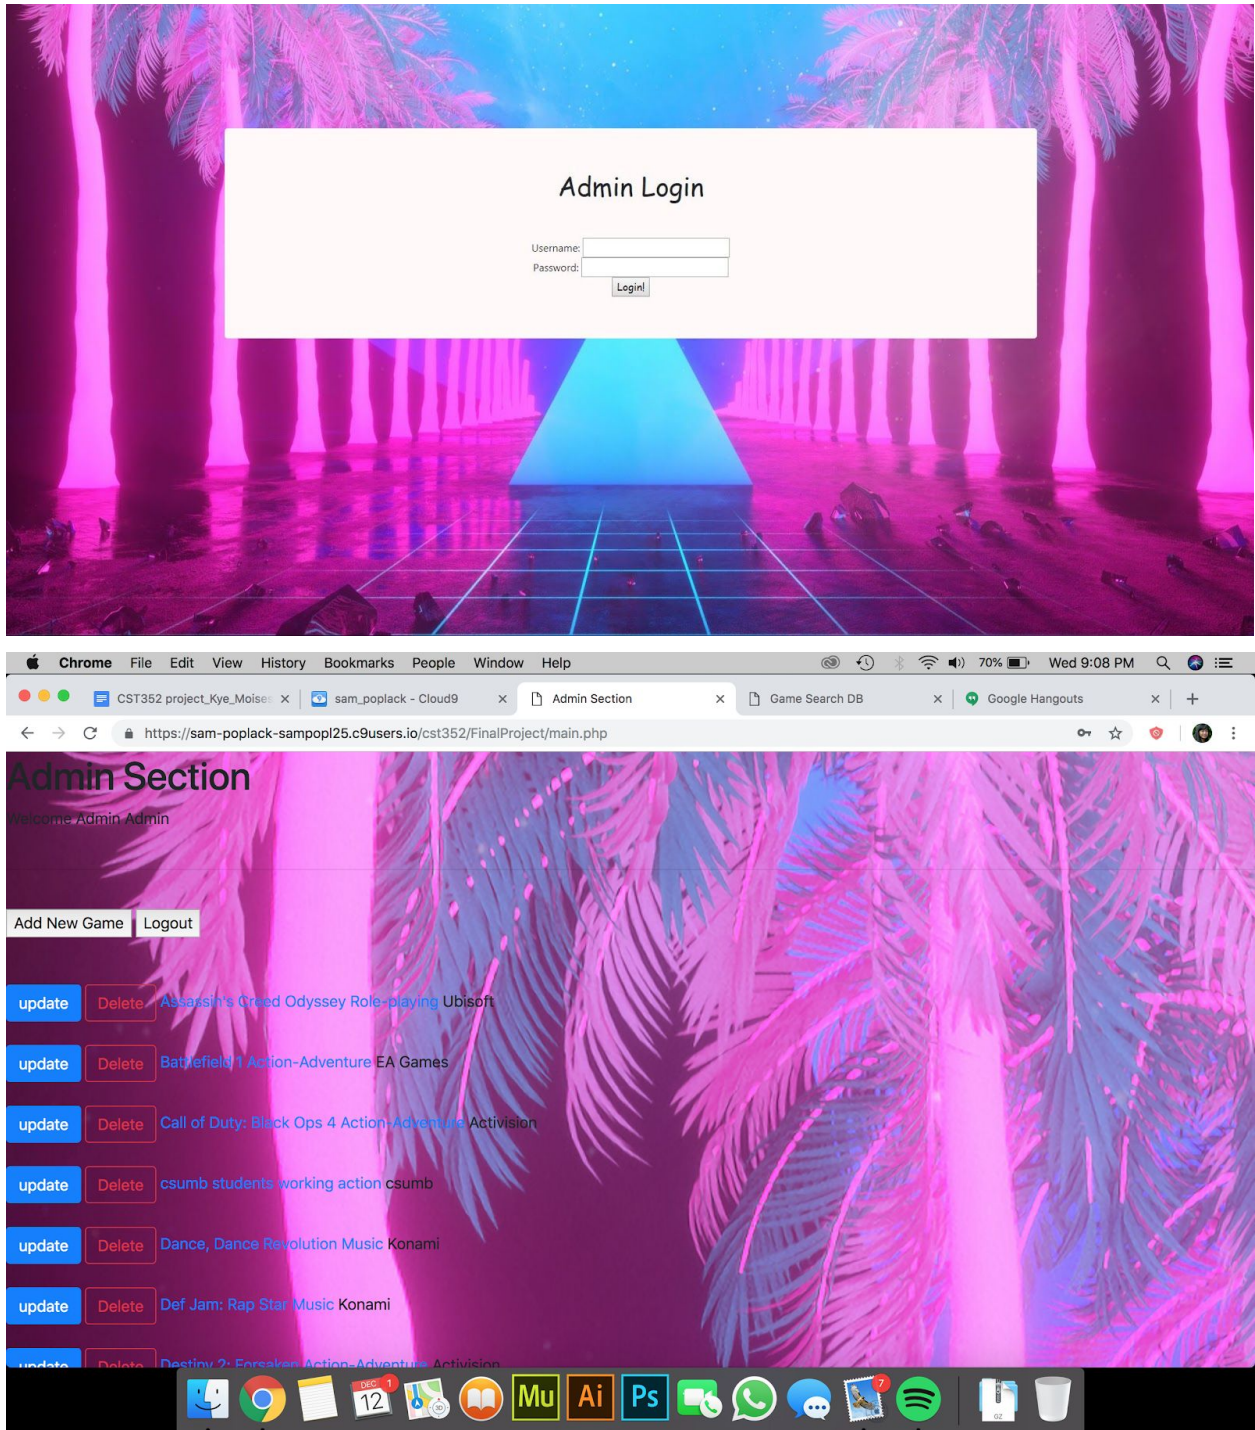

DELETE

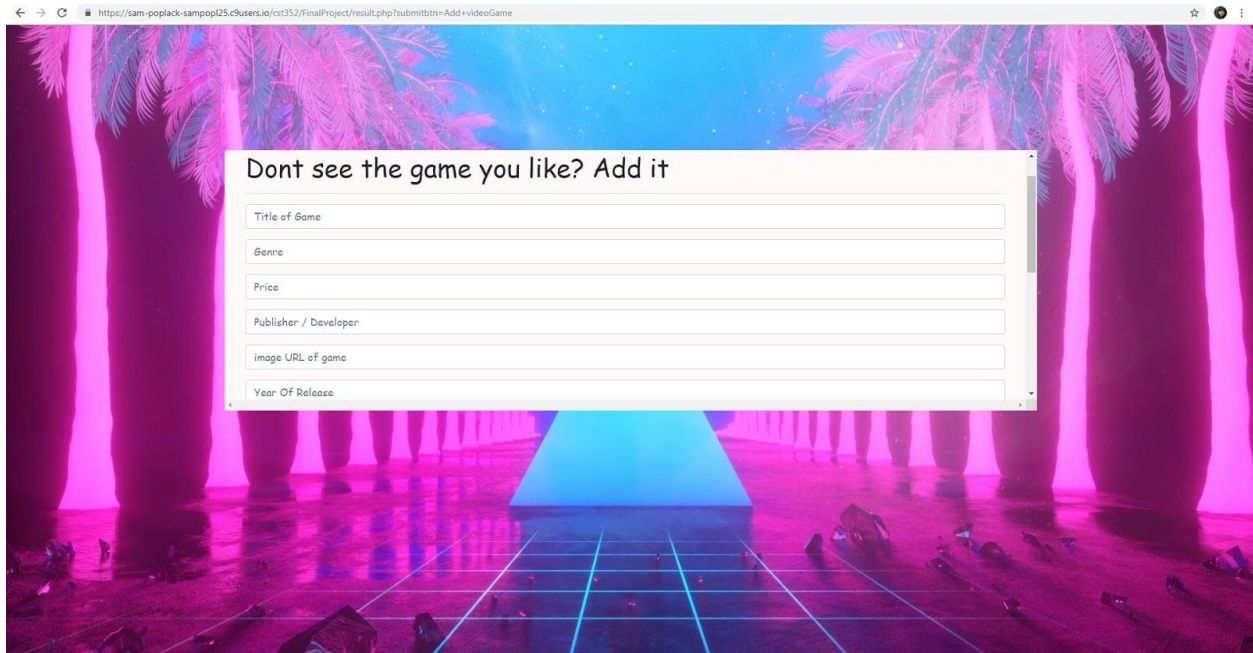

## Screenshots of vidBox database webpage:

## User Story:

- ❑ As a gamer, I want to view details of video games currently available in the market so that I can make an informed decision as to which video games to purchase.
- ❑ As an owner of specific game consoles, I want to find out if the video game I want is playable in my console so that I can determine whether it's worth purchasing.
- ❑ As a second-hand video game retailer, I want to see how the prices of the video games I'm selling stack up against other online or local retailers so that I can sell my used video games at competitive and fair prices.
- ❑ As a vidBox admin, I want to ensure that the other administrators that are adding/deleting video games from my database are inputting correct information so that no false info will be injected into my database.
- ❑ As a vidBox admin, I want to generate the total price of at least two records from the videoGames table so that I can compute the total price of games currently available in my database.
- ❑ As a casual viewer of vidBox, I want a "user" section (index.php) so that I can retrieve data from vidBox without having to log in as an admin.
- ❑ As a consumer, I want to generate the total price of all the video games I've picked out from vidBox so that I can see whether or not I can afford them.
